

2 JUN 2026

Lew Thompson W5IFQ

Field Day 2026

When: 27 – 28 June, 1 PM Saturday till 1 PM Sunday

Where: Holy Cross Lutheran Church - 4622 South Lamar Blvd. (building A)

Operations Details:

- **Three scoring stations:**
 - **TCARES Emergency Trailer – HF Alternate + Emergency Power**
 - **VHF/UHF Multi-mode (above 50 MHz and up)**
 - **HF digital modes (160m – 10m)**
 - **HF CW (160m – 10m)**
 - **GOTA (Get on the Air) – HF SSB**
 - **Designation – 3A STX (W5KA)**
 - **Scoring – N3FJP Wireless Network**
 - **Operating spaces are air-conditioned!**
- **Meals (provided by AARC):**
 - **Saturday Lunch – Pizza**
 - **Saturday Evening – BBQ**
 - **Sunday – Breakfast tacos**

Purpose of Field Day

- Demonstrate the ability to set up an Amateur radio station in the field on emergency power and communicate effectively over all of CONUS.
- Increase public awareness of Amateur Radio
- Operator Training
- Recruitment of new hams
- Have fun

2026 AARC FD Officials

- Field Day Coordinator – Zoe KN6DQD
- TCARES Trailer and TCARES IC – Chris KJ5DJC
- HF/VHF/UHF Station Captain – Jeff N5MNW
- GOTA Station Coordinator – Ronnie KC5EES
- CW Station Captain – Lew W5IFQ
- Antenna Contest Coordinator – Lew W5IFQ
- Church Facility Coordinator – Lew W5IFQ
- N3FJP Wireless Network – Paul KD5VRU

Scoring Using N3FJP Wireless Network (Paul Kinney, KD5VRU)

The screenshot displays the N3FJP software interface, which is used for logging and scoring amateur radio contacts. The interface is divided into several sections:

- Recent Contacts:** A table listing recent contacts with columns for Rec, Call, Class, Sec, Date / Time, Bnd, Mode, Country, and Operator. The table shows contacts from 06:24 to 06:24, including calls like K400, KC2AUO, W20W, N8SL, W2RC, W2RX, W4GR, VE3HB, W8BM, WCBVQA, and W3TE.
- Score Statistics:** A summary of scores including:
 - Total CW Contacts: 8
 - Total Phone Contacts: 309
 - Total DIG Contacts: 0
 - Total QSO Points: 325
 - QSOs / Hr (Last 20 min): 0
 - QSOs / Hr (Last 60 min): 0
- Call, Class, Section:** A section for entering call information, currently showing 'K'.
- Possible Duplicates:** A list of potential duplicate calls, including K2VN, K1EEE, K4HJ, W3K8, KQ3NE, K140JP, K8HRC, K2YS, KC2WI, KC9PQA, W4JK, KB1EKZ, KB1TJC, KB1QJK, KB4KY, K9LA, and K2YWR.
- State Grid:** A grid of US states and Canada, with some states highlighted in red (e.g., CT, RI, DE, MDC, AR, NTX, AK, NV, CO, MO, IA, ND, KS, NE, MN, SD, AB, NT, BC, ONE, GTA, ONN, MAR, ONS, MB, QC, NL, SK).
- Band and Mode:** A section for selecting the band and mode, currently set to 40 and PH.
- Log Table:** A table at the bottom showing a log of contacts with columns for ZS, AF, EU, NA, OC, and AS, along with their respective scores.

APPENDIX 1

Field Expedient HF Antennas Contest For 2026 ARRL Field Day

Awards

ICOM IC-7300 MK2

ICOM ID-52A

Logistics of Contest

- **AARC will supply the following:**
 - 32 ft. mast with a rope and pulley;
 - HF Auto tuner, (LDG AT-1000ProII) at rig;
 - HF remote auto-tuner with bias-T's (CG-3000 with W5IFQ bias-T's);
 - 4:1 and 1:1 baluns;
 - Coaxial cable from rig to mast base;
 - Dedicated HF rig with built-in tuner (3:1 SWR maximum).
 - Laptop with EZNEC Pro available for modeling your antenna. (W5IFQ will assist).
 - A sign-up schedule;
 - A MFJ-269B SWR Analyzer;
 - N3FJP Network Software
 - Prize(s) details:
 - Award to Member who makes the largest number of FD contacts during 1 hour interval;
 - Each contestant will be given equal time periods to make SSB voice contacts;
 - Contacts must be scored using N3FJP Network software (using contestant's initials).

Field Expedient Antenna Contest Rules

- All antennas components must be home made with the following exceptions:
 - Store-bought dipole center supports i.e., Ladder-loc, DX Engineering EZ-Build or similar parts;
 - Dipole end insulators;
 - Special baluns like 49:1 (1:1 and 4:1 baluns will be provided);
 - ARRL End-Fed Half-Wavelength kit (contestant must build kit);
- All Traps must be home made;
- Vertical metal masts must be made from readily available aluminum or steel tubing or pipe.
- Dielectric masts for support of vertical wire can be either fiberglass telescoping or fixed section masts;
- Maximum RF power to be 100 watts.
- Mode to be SSB Voice.
- Operation must be in HF FD frequency bands including 6m.
- Only complete FD exchanges will be scored.
- Contestants will each have one-hour “mast-time” to tune antenna. No time limit on verticals and other antennas not using the provided mast hoist assembly.

Please Register Early for Contest

- Send your intent to compete to:
- Lewis Thompson, W5IFQ
- Text to 512-587-9944 or
- Email to w5ifq@att.net
- Please describe what you will need:
 - Mast (32 ft. aluminum with internal halyard)
 - Balun (1:1 or 4:1)
 - Type of tuner (rig located or remote)
